Run improves the next opportunity.

EirNova's medicines need **controlled storage.**

Temperature and humidity must stay within limits

Existing sensors raise an alert. The affected batch is held for quality review.

8h to review-ready evidence

SEK 1m / year

2 delay-related write-offs
x SEK 500k batch cost

Illustrative assumptions.
Cost exposure, not promised savings.

Held batches await **a quality decision.**

Quality needs the evidence to release or reject a batch.

Sensor history. Batch records. Equipment history. Approved procedures.

Could Northstar shorten the evidence search?

8h to review-ready evidence

SEK 1m / year

2 delay-related write-offs
x SEK 500k batch cost

Illustrative assumptions.
Cost exposure, not promised savings.

Alex prepares for the customer meeting.

Ask before promising

The alert works. What must Northstar understand about the review?

signed rule unchanged

Draft updates

drafted · not applied

Same held batch. **Two conflicting instructions.**

New request from Operations

**Readings normal again?
Release the batch automatically.**

Signed quality requirement: RULE-A1

**Review the full incident.
Quality approves release first.**

Decision recorded

RULE-A1 retained. Draft updates await owner approval.

Now the team has to **make it work.**

An agreed first version

Connect sources

→ Assemble evidence

→ Route review

› /plan Build BatchGuard from EN-002. Reuse existing components and preserve RULE-A1 approval.

• PLAN

✦ plan Using the loaded EN-002 brief and signed RULE-A1

↳ Reuse the toolkit v1.3 sensor connection and approval pattern

implementation-plan.md

Plan for this held batch

Collect linked records for the full incident history.

Alert the quality reviewer. Keep this batch on hold until approval.

Check that normal readings alone cannot trigger release.

EN-002 + RULE-A1 · no implementation started

plan approval needed

➤ Approved. Build the first version and check that this held batch cannot be released without quality approval.

• INTERACTIVE

✦ **build** Engineer-supplied integration applied; v1.3 sensor adapter reused

↳ 11/12 illustrated scenarios pass

↳ FAIL 08: release action handled as a notification; approval skipped

scenario-08-results

This held batch: approval check failed

Expected: wait for quality approval.

Actual: release automatically when readings return to normal.

The release action was treated as a notification. Required review was skipped.

11/12 illustrated scenarios · selected above-threshold case

correction needed

› Fix that approval mistake. Run the checks again and prepare the evidence for release review.

✦ **edit** Release action now requires quality approval for this case

↳ 12/12 illustrated scenarios pass; RULE-A1 retained

↳ EN-003 evidence ready for RELEASE REVIEW

EN-003-release-evidence.md

EN-003: ready for software release review

Approved brief and RULE-A1 linked to the implementation and check results.

All 12 illustrated scenarios pass. The failed check and correction are recorded.

Reviewer checks and operating instructions included. Customer validation and human release review remain.

Evidence pack · neither deployment nor batch release approved

RELEASE REVIEW

› Check our shared toolkit. Which useful improvement from this project should the next team inherit? Propose it without publishing.

✦ **compare** Project changes against central toolkit v1.3

↳ Existing sensor adapter reused. New candidate: Alert triage kit

↳ Candidate ready for boundary review. Nothing published

Alert triage kit

Already in v1.3: sensor adapter and approval pattern. Reused here.

Proposed skill: prepare review evidence, with checks for action types and source links.

Next: review what can be shared and test with invented cases from another project.

Candidate only · central toolkit unchanged at v1.3

boundary review

Now the team has to **make it work**.

A correction worth keeping

Approval check corrected.

EN-003 ready for release review.

Alert triage kit
Reusable candidate.

Now the quality team has **BatchGuard**.

Earlier: an eight-hour evidence chase

Illustrative baseline. The batch's saleable window keeps shrinking.
